SUMMARY

Flutter developer with 10 months of hands-on experience in building cross-platform mobile apps and integrating them with embedded systems.

Passionate about developing efficient, real-world solutions that connect hardware and software. Currently expanding skills in cybersecurity and C programming to build secure, high-performance applications.

SKILLS

Mobile App Development: Flutter, Dart, Firebase, REST APIs, UI/UX Implementation

State Management: GetX, Provider, BLoC

Programming: Dart, C, Python(basic), Object-Oriented Programming

Operating Systems: Linux (CLI, System Setup & Debugging)

Networking: TCP/IP, Network Configuration, Socket Programming, IoT Communication Protocols

EDUCATION

Higher Secondary in Computer Science

(2023-2024)

PROJECTS

1. E Stocker – Inventory Management App

- Flutter app for managing products with barcode scanning, adding items, and generating invoices.
- Integrated REST API for real-time updates and stock tracking.

2. Netflix Clone App (Flutter)

- Built UI/UX similar to Netflix, implemented video streaming with REST API.
- Focused on smooth navigation, dynamic content, and responsive design.

3. To-Do App with REST API

- Task management app in Flutter with CRUD operations via REST API.
- Implemented state management using GetX/Provider/BLoC.

4. Hardware/Embedded Projects

- DIY IoT Home Automation (ESP32 + Flutter app)
- Temperature & Humidity Monitoring System (Arduino + Sensor + Mobile Alerts)
- Other electronics projects: Sensor interfacing, LED automation, and IoT-based prototypes
